

Toshiba announces UEM India Private Limited name change to Toshiba Water Solutions Private Limited

New Delhi, February 19, 2019: Toshiba – a global leader in manufacturing electrical system for water supply and sewerage facilities for over 40 years, today announced the name change of its 100% Indian subsidiary – UEM India Private Limited (UEM) to Toshiba Water Solutions Private Limited. Toshiba acquired 100 percent stake in UEM in March 2018. Current shareholding in UEM is shared between Toshiba Corporation (56.11%) and Toshiba Infrastructure Systems & Solutions Corporation (43.89 %). The new name is effective from February 12, 2019 and will be implemented across the company's product and services.

“UEM is already an international company having executed over 400 projects in over 30 countries. With offices in five countries, UEM provides complete, single-source services from design and engineering, to construction and installation of bespoke water, wastewater and municipal water and wastewater treatment facilities across the world. Now with the formal adoption of Toshiba name, the company will have access to wider customer base in India and overseas, while reiterating the Japanese quality and commitment that Toshiba name carries. Building on from our global experience, we design advanced technologies and solutions to ensure their long-term sustainability for water management projects across the world”, said **Koichi Matsui, Chairman and Managing Director, Toshiba Water Solutions Private Limited.**

Toshiba Water Solutions Private Limited will continue to have its corporate office in Gurugram, India and specialize in providing turn-key services in water and wastewater management, staying committed to the mission of Clean India – FOR THE NEXT INDIA. Toshiba Water Solutions will provide complete, one-stop solution from design and engineering to construction, installation, operation and maintenance of water and wastewater treatment facilities. Toshiba Water Solutions will offer multiple modern technologies like ZLD (Zero liquid Discharge) using HERO™ (High Efficiency Reverse Osmosis), Anaerobic Biological Treatment (ABT), Activated Sludge Process (ASP), Sequential Batch Reactor (SBR), Membrane Bio Reactor (MBR), etc.
